

## OVERVIEW

Information Edge integrates Business Scorecard Manager with its powerful data warehouse service, TeraSolve. Together they give the enterprise real-time access to business performance for fast and accurate decision-making across all levels of the organisation.

The new application leverages the power of Business Scorecard Manager to help organisations build, manage and use scorecards and key performance indicators (KPIs), and perform deep analysis – all within an intuitive, collaborative environment.

## TERASOLVE DATA WAREHOUSE TECHNOLOGY

**Information Edge's technical superiority solves the 7 biggest challenges in BI which are:**

|                           |  |
|---------------------------|--|
| ■ <b>SCALABILITY</b>      | – take an enterprise rather than silo view   |
| ■ <b>LIKE FOR LIKE</b>    | – our reporting works with and reflects changes in your business                       |
| ■ <b>RELIABILITY</b>      | – our system is unbreakable  |
| ■ <b>ACCURACY</b>         | – our system cannot be incorrect because it is supported by unique patents             |
| ■ <b>SPEED</b>            | – our system reports are on average ten to a hundred times faster than our competitors |
| ■ <b>FLEXIBILITY</b>      | – our system is fast, low-risk, cost efficient and learns as it goes                   |
| ■ <b>SELF-MAINTENANCE</b> | – low administration costs   |

## HOW INFORMATION EDGE ADDS VALUE TO BSM

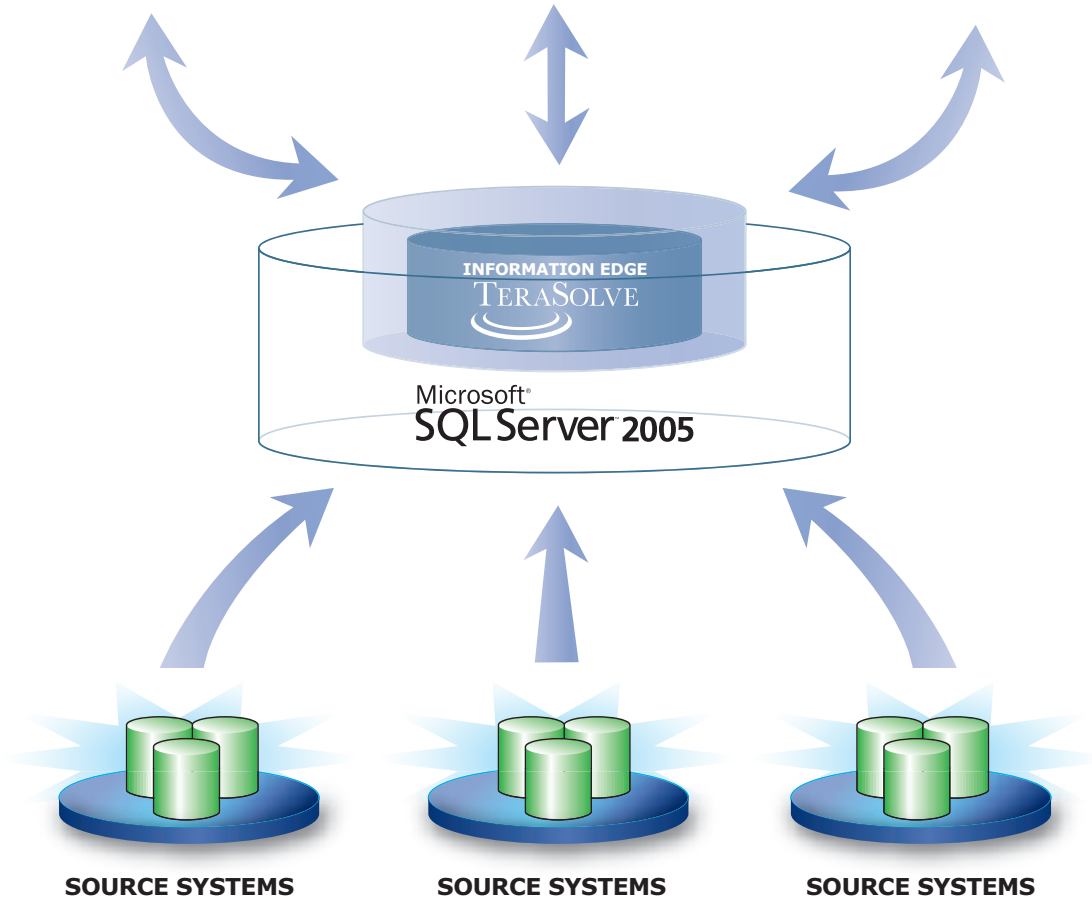

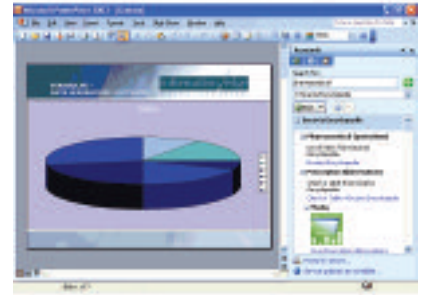

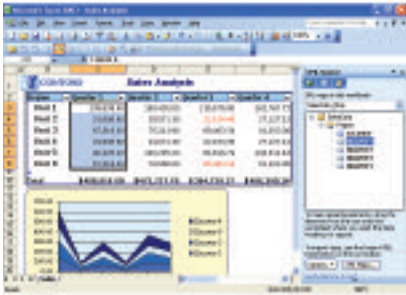

**Out-of-the-box functionality to:**

|  |
|--|
| ■ Define business models (organisation structures, performance measures, time periods etc) |
| ■ Set user permissions and security  |
| ■ Easy to use bulk data load tool with scheduler   |
| ■ Entry screens for manual data entry  |
| ■ Full accounting intelligence (debits/credits, income/expenses assets/liability)          |
| ■ Supports complex multidimensional calculations and allocations                           |
| ■ Audit trail of all changes to the system   |
| ■ Drill down from summary totals to details and even transactions                          |
| ■ Excel interface for ad hoc reports   |
| ■ Microsoft Reporting services for production reporting                                    |

**Technical advantages**

|  |
|--|
| ■ Unlimited dimensionality   |
| ■ Handle real world data volumes – benchmarked to 300 Gb raw data                      |
| ■ Data stored in SQL Server with true transactionality giving stability                |
| ■ Patented calculation engine always gives the correct answers                         |
| ■ Track business change accurately making 'like for like' reporting easy and intuitive |
